Early-Stage Collaborations

If you are seeking a collaboration or investment to advance your innovative healthcare solution, make the connection with our Johnson & Johnson Innovation team.

Our regional innovation teams are located around the globe in the life sciences hot spots of Shanghai, Boston, South San Francisco and London. Each team comprises deep scientific, commercial, investment and deal-making expertise as well as company incubation, lab space and networking opportunities that can help accelerate promising science. Our teams are the gateway to access a variety of skills, resources and infrastructure from across Johnson & Johnson, including:

- Early-stage research funding
- New company creation
- Pricing and reimbursement
- Licensing and collaborations
- Integrated healthcare solutions
- Preclinical, manufacturing and clinical expertise
- Early- to late-stage equity investments
- International markets expertise

Our teams are interested in collaborating with regional entrepreneurs at startup companies, universities and institutes who are developing early-stage innovations that are pre-proof of concept in humans across the Pharmaceuticals, Medical Devices and Consumer Health business segments.

With a base at our Innovation Center, located in central London, UK, and a footprint that spans Europe, the Middle East and Africa, our team is embedded in the innovation ecosystem connecting entrepreneurs, scientists and emerging companies to our own expertise and to our broad global network.

Nerida Scott
