About us

Johnson & Johnson Innovation has developed a new model to support entrepreneurs launching a biotech or biopharmaceutical company. We have created a network of incubation facilities around the world to accelerate early stage company growth and XX, XX.

JLABS

With facilities in San Diego, San Francisco, South San Francisco, Cambridge, Mass., Houston and Toronto, Johnson & Johnson Innovation, JLABS (JLABS) provides a capital-efficient, resource-rich environment where emerging companies can transform the scientific discoveries of today into the breakthrough healthcare solutions of tomorrow. JLABS is a “no-strings-attached” model, giving innovators the freedom to build value.

JLINX

Our multi-faceted initiative in Europe is designed to identify and nurture early-stage companies who are actively pursuing research with the potential to transform human health. Located in a fully dedicated facility on the Janssen Research & Development Campus in Beerse, Belgium, JLINX offers opportunities for start-ups to exchange ideas and collaborate while accessing a unique combination of resources including investment, infrastructure, and access to relevant internal and external scientific, technical and business expertise.
